SKILLS

HTML5 (PUG)

CSS3 (Bootstrap, SASS, BEM)

Javascript (ES6, React, React Native, Redux)

Node (NPM, Express, Mocha, Chai)

PHP (PHP-FIG, Composer)

GIT (Gitlab, Github, BitBucket)

MySql

Linux

WORK EXPERIENCE

Junior Web Developer - Embrapa Pecuária Sul(2018-Current)

I joined the team in creating new tools for researchers and producers in the region to use.
In our new API in development, I created the environment for testing it.A great challenge was to deal with the legacy systems of more than ten years, totally monolithic, so I used best practices to encapsulate everything possible in functions, I used design patterns like builder to dismember large functions in small functions.

Achievements

- Implemented the first test structure of the Embrapa Pecuária Sul.
- I created the structure for older systems to support mobile.
- Developed new tools for genetic analysis with JavaScript and PHP.

Junior Web Developer - Facil Consulta (2018-2018)

Responsible for bug fixes, system optimization and design improvements with the team.

Achievements

- I learned more about code versioning and task control.
- I have created screens responsible for running both desktop and mobile.
- I optimized the loading of system pages by 60%.
- I had the opportunity to work with a totally organized team following the scrum methodology.

Fellowship of scientific initiation - Embrapa Pecuária Sul (2017-2018)

I had the opportunity to work with incredible people here, I was responsible for developing new methods of extracting data from research by Embrapa.
I also recreated a system from scratch using the MVC layer with PHP and javascript to make requests, I had the opportunity to improve the quality of my work here and started my life as developer, was a very good experience.

Achievements

- I've created ways to capture thousands of Embrapa search data using Google Analytics
- Created new systems using SOLID principles to develop better architectures
- I improved my communication skills with the team.
- I totally recreated a legacy system in an object-oriented system with an MVC layer.

Education

Post graduation in mobile device engineering - Uninter (2018-Current)

Graduation in systems analysis and development - Uninter (2016-2018)

Computer technician for internet - Ifsul (2014-2016)

Courses and certificates

- Scrum Fundamentals Certified - ScrumStudy
- White Belt Six Sigma Certification - EscolaEDTI
- Six Sigma Yellow Belt - 6sigmastudy
- Responsive Web Design - FreeCodeCamp
- JavaScript Algorithms and Data Structures - FreeCodeCamp
- Fast MBA Business - FastMBA
- Full English Course - Braden Chase/Udemy
- Microsoft Cloud Computing Basics - Microsoft
- Understanding and Documenting REST / RESTful APIs - Udemy
- Complete Course Developer NodeJs and MongoDB - Udemy
- English for IT - Information Technology - learncafe
- Docker Essential Developer Tool - Udemy
- Online course laravel 5.5 with VueJs - Udemy
